ART UNIT PAPER NUMBER 1077 NORTHERN BOULEVARD ROSLYN, NY 11576 1742

DATE MAILED: 02/12/2004

Please find below and/or attached an Office communication concerning this application or proceeding.

	Application No.	Applicant(s)
Office Action Summary	10/019,710	KNIAZEV, EVGUENI
	Examiner	Art Unit
	Harry D Wilkins, III	1742
The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply		
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).		
Status		
1) Responsive to communication(s) filed on	_·	
	action is non-final.	
3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under <i>Ex parte Quayle</i> , 1935 C.D. 11, 453 O.G. 213.		
Disposition of Claims		
4) ☐ Claim(s) 1-3 is/are pending in the application. 4a) Of the above claim(s) is/are withdray 5) ☐ Claim(s) is/are allowed. 6) ☐ Claim(s) 1-3 is/are rejected. 7) ☐ Claim(s) is/are objected to. 8) ☐ Claim(s) are subject to restriction and/or		
Application Papers		
9) The specification is objected to by the Examiner.		
10) The drawing(s) filed on is/are: a) accepted or b) objected to by the Examiner.		
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a). Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).		
11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.		
Priority under 35 U.S.C. § 119		
 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a) All b) Some * c) None of: 1. Certified copies of the priority documents have been received. 2. Certified copies of the priority documents have been received in Application No 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)). * See the attached detailed Office action for a list of the certified copies not received. 		
Attachment(s) 1) Notice of References Cited (PTO-892)	4) 🔲 Interview Summary	(PTO-413)
2) Notice of Draftsperson's Patent Drawing Review (PTO-948) 3) Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08) Paper No(s)/Mail Date 12272001. U.S. Patent and Trademark Office	Paper No(s)/Mail Da

Art Unit: 1742

DETAILED ACTION

Specification

1. A substitute specification in proper idiomatic English and in compliance with 37 CFR 1.52(a) and (b) is required. The substitute specification filed must be accompanied by a statement that it contains no new matter.

Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claims 1 and 3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hiraki et al (US 6,337,060) in view of Suzuki et al (JP 56-152582).

Hiraki et al teach (see abstract and Example 2) a method of coating including treating diamond particles in a sulfuric acid solution, washing with purified (distilled) water and then plating using a nickel plating solution (i.e.-ultradispersed diamond particle solution) to form a composite coating including dispersed diamond particles.

However, Hiraki et al do not teach treating the diamond particles with a cationically active substance prior to the coating but after the washing with purified water.

Suzuki et al teach (see abstracts) treating diamond powder for dispersion in electroplating of nickel by contacting the diamond with a cationic surface active agent. This process improves adhesion of the diamond particles to the deposited metal layer.

Application/Control Number: 10/019,710

Art Unit: 1742

Therefore, it would have been obvious to one of ordinary skill in the art to have further treated the washed diamond particles of Hiraki et al with a cationic surface active agent as taught by Suzuki et al because the cationic surface active agent improves the adhesion of the diamond particles to the deposited metal layer.

Regarding claim 3, Hiraki et al teach (see Example 2) using nickel as the electrolyte suspension.

4. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hiraki et al (US 6,337,060) in view of Suzuki et al (JP 56-152582) as applied to claims 1 and 3 above, and further in view of "Cationic Surfactant".

The teachings of Hiraki et al and Suzuki et al are described above.

However, Suzuki et al does not teach that the cationic surface active agent is a tertiary or quaternary ammonium base.

"Cationic Surfactant" discloses (see page 1) the general state of the art of cationic surfactants (i.e.-surface active agents), particularly that quaternary ammonium compounds are the dominant commercial example and that they exhibit biocidal properties.

Therefore, it would have been obvious to one of ordinary skill in the art to have used a quaternary ammonium compound as taught by "Cationic Surfactant" as the cationic surface active agent of Suzuki et al because the quaternary ammonium compounds are conventional cationic surfactants that also exhibit biocidal properties that would aid in making sure that the diamond particles are clean.

Art Unit: 1742

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Harry D Wilkins, III whose telephone number is 571-272-1251. The examiner can normally be reached on M-Th 10:00am-8:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Roy V King can be reached on 571-272-1244. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
